As a Software Engineer, I specialize in developing full-stack web applications with a knack for leveraging diverse frameworks and libraries. I am known for my strong communication skills, leadership, and logical thinking, thriving in environments that require teamwork and innovation. I am passionate about connecting with fellow tech enthusiasts to share ideas and explore new opportunities. I am committed to mastering the latest technologies and methodologies to enhance my expertise in website architecture and development. My goal is to continually improve and stay ahead in the everevolving tech landscape

Education

BACHELOR'S SOFTWARE ENGINEERING (BS-SE)
Information technology university ,Lahore **(2021-2025)**

Skills

- Frontend: HTML, CSS, JavaScript, React.js
- Backend: Node.js, Express.js, Nest.js
- Databases: MongoDB, PostgreSQL
- Programming Languages: C++, JavaScript
- Tools & Frameworks: Git, Postman,Stripe – Wallet Integration

Technical Projects

Hotel Management System (Node.js + Express + PostgreSQL)

- Created a hotel management app handling bookings, reservations, and check-ins using Express.js and PostgreSQL with role-based access control and session management.

- Developed responsive pages with HTML, CSS, and JavaScript, ensuring detailed reservation tracking and enhanced usability.

Food Ordering Platform (React + Node.js + MongoDB)

- Developed an online food ordering platform with real-time order tracking using WebSocket's.
- Integrated user authentication, cart management, and secure payment modules.
- Built an admin dashboard for restaurant owners to manage menus, orders, and revenue.

Portfolio Website (HTML + CSS + JavaScript + React)

- Designed a personal portfolio website showcasing projects and skills using React and modern CSS animations.
- Added dynamic routing, contact form integration, and optimized SEO for better visibility.

Student Record Management System (C++)

- Developed a console-based student management system applying OOP principles (inheritance, encapsulation, polymorphism).
- Implemented file handling for persistent data storage and efficient search/update algorithms.

Cinema Management System (MERN + Nest.js)

- Built a full-stack cinema booking system using Nest.js, React, and MongoDB with real-time seat allocation and secure payment flow.

- Implemented JWT authentication, role-based authorization, modular APIs, optimized queries, and a responsive React UI for smooth navigation.
